The SCBA Advantage

Written by: Lisa Vorce Senepol Cattle Breeders Association PO Box 429 O'Fallon, IL 62269

SCBA Key Features for the Rancher

EPDs (Estimated Progeny Difference) Foundation Senepol database Senepol World & Sire Summary Online Registration

EPDs (Estimated Progeny Difference)

EPDs are a tool breeders can use to select their cattle. SCBA maintains the largest database of Senepol performance data. This performance data is then used to create the EPDs used in the annual sire summary. What Performance data is maintained by SCBA? Birth Weight Weaning Weight Yearling Weight **Ribeye** area Intramuscular fat Fat thickness Scrotal Circumference Hip Height

Once your performance data is submitted, interim (short term) EPDs are calculated immediately

Annually SCBA pays to have our database analyzed so higher accuracy EPDs can be calculated.

Registering Animals - Manually Entering Data Process

Register calf?

Click Drop down arrow to select Yes or No.

Registering Animals – Upload a CSV Spreadsheet

Prepare a CSV (comma separated value) spreadsheet with your data ahead of time.

Contact SCBA office for an Excel spreadsheet to use when registering cattle with this method.

It is highly recommended you use the manual method first before attempting to upload your data.

Whole Herd Reporting affects your EPDs

The more data entered into the database, the higher accuracy your EPDs will be. When registering only your "Best calves" the ratio on the good calves is lowered because the average of the group is increased.

Whole Herd Reporting affects your EPDs

Calf	WW
Α	600#
В	550#
С	500#
D	450#
E	400#

WHR WW Ratio

EPDs are established upon ratios in contemporary groups.

SCBA wants to work with all Senepol breeders to create a breed which will meet the consumer demands for delicious tender beef. Together we can achieve this goal.

Thank you!
